The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 24-34 are directed to isolated nucleic acid molecules comprising nucleotide sequences (both mRNA and cDNA) encoding a human NADPH oxidase of specific amino acid sequence, vectors and host cells comprising said molecules and methods of expressing said molecules.

Claimed nucleotide sequences are free of prior art. Further, the prior art does not teach or suggest preparing such specifically claimed nucleotide sequences. Hence said sequences are also non-obvious. Since said nucleotide sequences are both novel and non-obvious, molecules comprising said nucleotide sequences, vectors and host cells comprising said molecules and methods of expressing said molecules are also novel and non-obvious.

Claims 24-34 are allowed.
